

Unitarian Universalist Theology within the House Metaphor:

We inherit a theology; we inhabit a house; we are transformers of our house.

Elements: The presence of the spirit of life is immediate and everywhere; immanent, transcendent, and interpersonal

Foundation: Humans have free will, conscience, ability to sense God, reason.

Walls: The church is formed by humans in a free relationship, making a promise to support one another.

Roof: God is loving; we are healed by the power of creative love; Hell is what we do to one another.

Door: Heaven can be here on Earth; we are the beloved community working to recognize ourselves

Windows: We work to be good neighbors. We let ourselves be changed by our neighbors.

Based on the presentation by Rev. Dr. Rebecca Parker, LREDA Lectures, 2002
